Provenance: Created through Chicago Academy of Sciences official activities.

Processing Note: Materials have been reorganized by subject and date.

Biographical Sketch: The State Microscopical Society of Illinois (SMSI), originally the Chicago Microscopical Club, was founded in Chicago in 1868. Many of the members that founded the society were members and founders of the Chicago Academy of Sciences (CAS), and the society was originally meant to be a division of CAS. However, the founders felt the SMSI would function better as a separate entity, so it remained independent and was later renamed from the Chicago Microscopical Club to the
State Microscopical Society of Illinois. The organization is credited with being one of the first scientific organizations formed in the United States.

Scope and Content: The materials found within this collection are part of the institutional records of the Chicago Academy of Sciences. Content includes the bylaws and constitution of the State Microscopical Society of Illinois (SMSI); letters between members of SMSI and members of the Chicago Academy of Sciences (CAS); letters and documents about the annual soiree held by SMSI and CAS; letters about membership dues that were owed to CAS from SMSI; letters and bills about general costs due to CAS from SMSI; SMSI member lists; announcements, pamphlets, postcards, and blank membership cards sent out from SMSI; SMSI Bulletins; and Diatom notes published by SMSI.

Related Resources: There are meeting announcements, meeting minutes, and meeting program information in the Leon F. Urbain manuscript collection.
